DETAILED ACTION

Examiner's Comment

Examiner acknowledges the cancellation of Claim 1 and newly added Claims 8-11.

Response to Arguments

Rejection under 35 USC § 112

Applicant's arguments, see amendment to Claims 2 and 6 and cancellation of Claim 1, filed 06/04/2008, with respect to the unclear subject matter have been fully considered and are persuasive. The rejection of Claims 1, 2 and 6 has been withdrawn in view of Applicant's amendment that cancels Claim 1 and amends Claims 2 and 6 to provide for and or clause between the lubricating and flushing limitations of lines 2 respectively.

Rejection under 35 USC § 102

Applicant's arguments, see the claim amendments, filed 06/04/2008, with respect to the rejection of Claims 1 and 3-5 held under 35 USC § 102 (b) have been fully considered and are persuasive. The rejection of Claims 1 and 3-5 has been withdrawn

in view of the cancellation of Claim 1 and the change of dependency of Claims 3-5 from claim 1 to claim 2 which was previously indicated as being allowable in Office Action Correspondence mailed 12/05/2007. Examiner has carefully considered the subject matter of Claims 2 and 6 and has determined them to be patentably distinguishable over the prior art or record due to the inner valve stem part having stubs for oil supply and discharge to the valve disposed within the rotatable valve stem where the valve stem part is rotative relative to an outer valve stem part where the outer valve stem part is further fastened with a mounting means to permit the present invention to spray injection oil into an internal combustion engine.

Applicant's discussion of the claimed features by contrast to the art of record is persuasive. In view of the present state of the claims and the absence of additional art, the reasons for allowance are considered clear for the record (see 12/05/2007 correspondence). As a result, Examiner is withdrawing the rejection to Claims 1 and 3-5 held under 35 USC § 102 (b).

Rejection under 35 USC § 103

Applicant's arguments, see the claim amendments, filed 06/04/2008, with respect to the rejection of Claim 7 held under 35 USC § 103 (a) have been fully considered and are persuasive. The rejection of Claim 7 has been withdrawn in view of the cancellation of Claim 1 and the change of dependency of Claim 7 from claim 1 to claim 2 which was previously indicated as being allowable in Office Action Correspondence mailed

12/05/2007. Examiner has carefully considered the subject matter of Claims 2 and 6 and has determined them to be patentably distinguishable over the prior art or record due to the inner valve stem part having stubs for oil supply and discharge to the valve disposed within the rotatable valve stem where the valve stem part is rotative relative to an outer valve stem part where the outer valve stem part is further fastened with a mounting means to permit the present invention to spray injection oil into an internal combustion engine where an oil filter is further included in the valve.

Applicant's discussion of the claimed features by contrast to the art of record is persuasive. In view of the present state of the claims and the absence of additional art, the reasons for allowance are considered clear for the record (see 12/05/2007 correspondence). As a result, Examiner is withdrawing the rejection to Claim 7 held under 35 USC § 103 (a).
